#### Product use

: Fabric Care

This SDS is designed for workplace employees, emergency personnel and for other conditions and situations where there is greater potential for large-scale or prolonged exposure, in accordance with the requirements of USDOL Occupational Safety and Health Administration.

This SDS is not applicable for consumer use of our products. For consumer use, all precautionary and first aid language is provided on the product label in accordance with the applicable government regulations, and shown in Section 15 of this SDS.

| SDS #            | 4 | D8282465 v2.0                              |
|------------------|---|--|
| Formulation #:   | : | FF#8268493 v1.0                            |
| UPC Code / Sizes | : | 16, 50, 75,100,150 oz HDPE plastic bottle. |

| 2. Hazards identification                  |   |  |
|--|---|--|
| Classification of the substance or mixture | : SERIOUS EYE DAMAGE - Category 1   |  |
| GHS label elements                         |   |  |
| Hazard pictograms                          |   |  |
| Signal word                                | : Danger  |  |
| Hazard statements                          | : Causes serious eye damage.  |  |
| Precautionary statements                   |   |  |
| General                                    | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. |  |

# 2. Hazards identification

| Prevention                          | : Wear eye or face protection.  |
|-------------------------------------|---|
| Response                            | : IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician. |
| Storage                             | : Not applicable.   |
| Disposal                            | : Not applicable.   |
| Supplemental label elements         | : None known.   |
| Hazards not otherwise<br>classified | : None known.   |

# 3. Composition/information on ingredients

| Substance/mixture | : | Mixture |
|-------------------|---|---------|
|-------------------|---|---------|

| Ingredient name                                       | %     | CAS number |
|---|-------|------------|
| Alcohols, C10-16, ethoxylated                         | 1 - 5 | 68002-97-1 |
| sodium chloride                                       | 1 - 5 | 7647-14-5  |
| Benzenesulfonic acid, C10-16-alkyl derivs.            | 1 - 5 | 68584-22-5 |
| Alcohols, C10-16, ethoxylated, sulfates, sodium salts | 1 - 5 | 68585-34-2 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

# 4. First aid measures

| Description of necessary first aid measures |  |  |  |
|---|--|--|--|
| Eye contact                                 | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.   |  |  |
| Inhalation                                  | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |  |  |
| Skin contact                                | : Get medical attention immediately. Call a poison center or physician. Flush<br>contaminated skin with plenty of water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear gloves.<br>Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a<br>physician. Wash clothing before reuse.  |  |  |
| Ingestion                                   | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. |  |  |

2/13

# 4. First aid measures

Loosen tight clothing such as a collar, tie, belt or waistband.

|  | ffects couts and delayed  |
|--|---|
| Most important symptoms/e<br>Potential acute health effe |   |
|  |   |
| Eye contact  | : Causes serious eye damage.  |
| Inhalation   | : No known significant effects or critical hazards.   |
| Skin contact   | : No known significant effects or critical hazards.   |
| Ingestion  | : No known significant effects or critical hazards.   |
| <u>Over-exposure signs/sym</u>                           | <u>otoms</u>  |
| Eye contact  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation   | : No specific data.   |
| Skin contact   | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur  |
| Ingestion  | : Adverse symptoms may include the following: stomach pains   |
| Indication of immediate me                               | dical attention and special treatment needed, if necessary  |
| Notes to physician                                       | : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled.  |
| Specific treatments                                      | : No specific treatment.  |
| Protection of first-aiders                               | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### See toxicological information (Section 11)

# 5. Fire-fighting measures

| Extinguishing media                          |   |
|--|---|
| Suitable extinguishing media                 | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media               | : None known.   |
| Specific hazards arising from the chemical   | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products     | : Decomposition products may include the following materials:<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Code # : D8282465 (Can                       | ada) SDS # : D8282465 v2.0 Date of issue : 18/05/2018 3/13  |

## 5. Fire-fighting measures

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## 6. Accidental release measures

| Personal precautions, protec   | ve equipment and emergency procedures   |
|--------------------------------|---|
| For non-emergency<br>personnel | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Do not breathe vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | If specialized clothing is required to deal with the spillage, take note of any information in<br>Section 8 on suitable and unsuitable materials. See also the information in "For non-<br>emergency personnel".  |
| Environmental precautions      | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | tainment and cleaning up  |
| Small spill                    | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash   |

upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or<br>on skin or clothing. Do not breathe vapor or mist. Do not ingest. If during normal use<br>the material presents a respiratory hazard, use only with adequate ventilation or wear<br>appropriate respirator. Keep in the original container or an approved alternative made<br>from a compatible material, kept tightly closed when not in use. Empty containers retain<br>product residue and can be hazardous. Do not reuse container. |
|--|---|--|
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers.  |

# 8. Exposure controls/personal protection

#### **Control**

#### **Occupational exposure limits**

| Not applicable.                    |  |
|------------------------------------|--|
| Appropriate engineering controls   | : If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.   |
| Environmental exposure<br>controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| ndividual protection measu         |  |
| Hygiene measures                   | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection                | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead.  |
| Skin protection                    |  |
| Hand protection                    | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Body protection                    | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection              | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection             | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |
|                                    |  |

# 9. Physical and chemical properties

| <u>Appearance</u> |                                    |
|-------------------|------------------------------------|
| Physical state    | : Liquid. [Transparent]            |
| Color             | : Yellowish./Pale color.           |
| Odor              | : Floral; Fruity.                  |
| Odor threshold    | : Not available.                   |
| рН                | : 7.5 to 8.5 [Conc. (% w/w): 100%] |
| Melting point     | : Not available.                   |
| Boiling point     | : Not available.                   |
|                   |                                    |

# 9. Physical and chemical properties

| -  |  |
|--|--|
| Flash point                                  | : Closed cup: >93.3°C (>199.9°F)                                       |
| Evaporation rate                             | : Not available.   |
| Flammability (solid, gas)                    | : Not available.   |
| Lower and upper explosive (flammable) limits | : Not available.   |
| Vapor pressure                               | : Not available.   |
| Vapor density                                | : Not available.   |
| Relative density                             | : 1.02 to 1.04   |
| Solubility                                   | : Easily soluble in the following materials: cold water and hot water. |
| Partition coefficient: n-<br>octanol/water   | : Not available.   |
| Auto-ignition temperature                    | : Not available.   |
| Decomposition temperature                    | : Not available.   |
| Viscosity                                    | : Dynamic (room temperature): >90 mPa·s (>90 cP)                       |
| Flow time (ISO 2431)                         | : Not available.   |

# 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : Do not mix with household chemicals.   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

# 11. Toxicological information

Other adverse effects : No known significant effects or critical hazards.

# 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## 16. Other information

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on MSDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
